

Graphing Events

One of the great rituals in competitive swimming is graphing your events on your body!! Each swimmer is responsible for graphing the events, heats and lanes for each race s/he is swimming. Please use the following example as the correct way to graph. Remember coaches are preparing for the meet and making last minute changes as needed. **Coaches will not be available to graph each child.** All of the information you need to graph your child can be found on the heat sheets sold at the meets. Begin by checking under your child's age group, then look for his/her name under each event. You may also put this information on your child's thigh if it does not fit on the arm. Please use a 'Sharpie' marker - it will come off easily at the end of the day.

Example: E represents Event, H represents Heat, and L represents Lane

E	H	L	
4	3	1	50 Free
18	4	2	MR
38	2	7	Breast
48	6	3	IM
60	3	8	Back
