

Accessing Meet Vision on a Mobile Site  
(Meet Heat/Seeding info & “real-ish” time results & meet status)

Our collegestation.swim-team.us has some great features, including the ability to access detailed meet information via the mobile site. This includes access full meet seeding details after the meet has merged, and before it has begun (essentially an online mobile heat sheet). And then once the meet has begun it provides near real-time meet results. Times still have to be manually entered after time sheets are collected and taken to the computer room; thus the short delay. However, times and results are up relatively quickly and right on your mobile device.

To access meet results, navigate to the collegestation.swim-team.us site on your mobile device.

(if your mobile device pulls up the full site and/or you have navigated to something that requires the full site and are on the full site, simply scroll, and scroll and scroll . . . keep scrolling, to the very bottom of the full site and click on “view mobile site”)

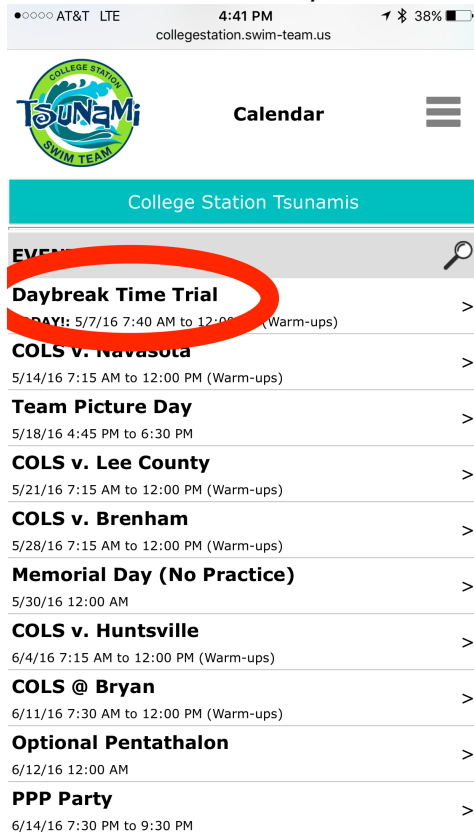

From the mobile site, click on the navigation drop down in the upper right hand corner.

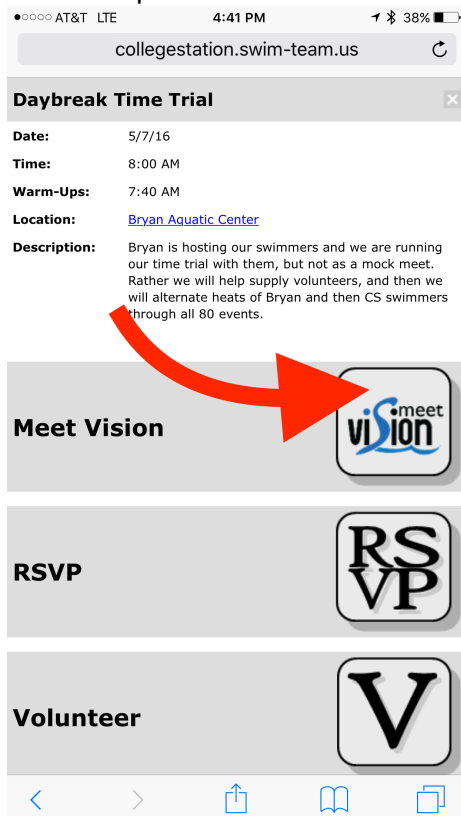

On the drop down list choose "Events/Meet Schedule" under the "Sections" header. You will not get to the correct screen if you choose "Mee/Event Schedule" under either the News Section or the Team Section.

Next choose the event you want to see details for.

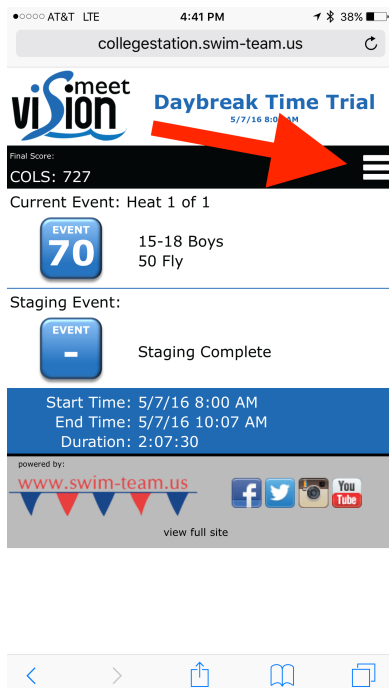

This will open the details screen for the event and give you the option for Meet Vision.

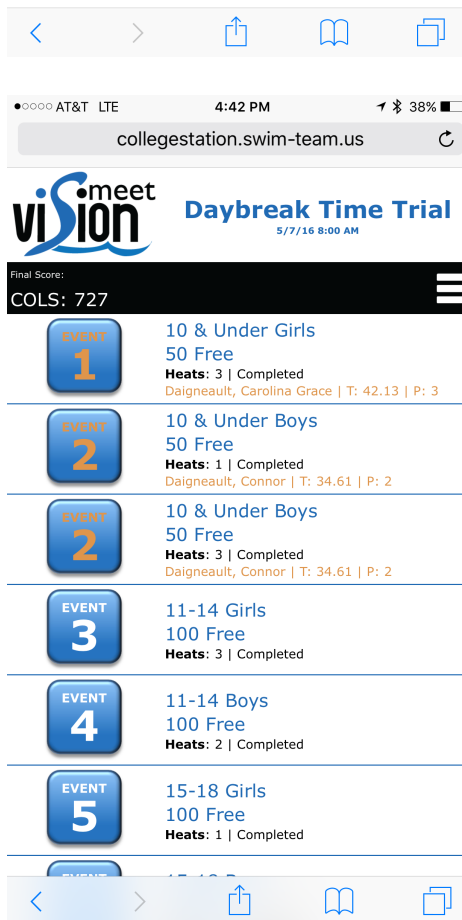

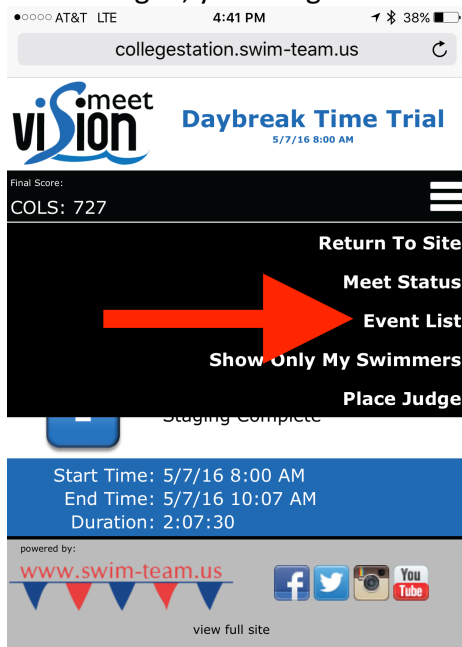

(Obviously from this screen you can also RSVP for the event, or sign up for a volunteer spot. At this time you cannot do your meet entries on your mobile site. You can use your mobile device, but you have to navigate to the full site.)

When you select Meet Vision, if the meet is not yet merged, you will get a blank screen that simply says, "this meet has not yet been merged." However, if the meet has been merged it will take you to the event list, or if the meet is already in progress it will take show the current event. In this case, our complete time trial. You can then click on the Meet vision navigation drop down.

Once merged, you can get event details before, during or after the meet, by clicking on the Event List.

(In this case since the meet is over, my swimmer's results show up in Orange. I do not know why Event 2 is doubled.)

You can click on each event to see heat & lane details before the event has been swum,
