EVENT TRACKER

The Event Tracker is responsible for keeping the event board accurate and up to date during home meets only.

HOME MEETS ONLY:

1. Obtain a copy of the updated heat sheet from the Computers volunteers.
2. Sit next to the Starter.
3. Ensure that the event board is at 'Event 1 Heat 1' at the beginning of the meet.
4. After the completion of each heat in an event, change the event board to reflect the next heat number.
5. After the completion of all heats in an event, change the event board to reflect the next event and heat number.
   - If a heat is skipped, ensure the event board accurately reflects the correct current heat number.
   - If two heats are combined, set the event board to reflect the current event/heat number. For example, if the swimmers from Event 56 Heat 1 swim during Event 57 Heat 1, the event board should show 'Event 57 Heat 1' for the race. If the swimmers from Event 57 Heat 1 swim during Event 56 Heat 1, the event board should show 'Event 56 Heat 1' for the race.
